NexSource Power achieves record HSE milestones

Sylvan Lake, Alberta

August 11th, 2016 marked a very important day in NexSource Power history. NexSource Power logged 365 days without a recordable incident. With successfully doing so, NexSource's 12 month TRIF now sits at **ZERO**.

Remaining recordable incident free for 365 days requires serious commitment, strong culture, and dedication from everyone.

Along with achieving this milestone, NexSource Power is also proud to recognize all team members for remaining Lost Time Incident free for 730 days (2 years).

This is a rarity within the industry, and NexSource Power is proud of all team members, and recognizes the importance of all team members participation.

“A huge THANK YOU goes out to our team for making safety priority one” says Darnell Dakin, President of NexSource Power. “This is an incredible accomplishment and required serious commitment and dedication from all of our employees. I know our customers are equally impressed and can be assured we will continue to strive to be a leader in our industry”.
